Website Design Terms

Once you sign-up, we will send you a document named “Design and Content”, asking you to provide all details regarding content and design of your new website. We are able to customize the following parts of the samples provided on our website: Header information, header color, header theme (image background of header), navigation buttons, website background color, fonts, width and height of the site.

Step-by-step design process

Creating your site, we proceed in the following sequence:

Together with you, we first agree on a design framework (template) for your site. We will present you up to three different styles which we proceed from.

Once this design framework is agreed upon, we start filling it with content.

Changing the design structure after content has been applied can result in additional hourly charges.

This does not apply to minor changes like font size, color and font family.

Please make sure that only one person presents all your design decisions to us.

Technical Limitations

Our designs are being produced within the limits of Adobe’s product line CS3. Designs and features that go beyond the technical possibilities of these professional products cannot be guaranteed. If you plan to implement Eastern languages, please check with us for availability. Some fonts from Thai or Vietnamese might not be compatible.

Flash Animations

We offer Flash animations as head banners or page elements for an additional price. We present you up to two different versions from which you can choose what is right for you. We ask you to proceed with us on a step by step basis. Changes that include redesign of key elements after previous approval will be calculated and charged at an hourly rate.

Payment

The full payment is required to start your project unless a payment plan has been negotiated. You will be able to control the progress of your site at any time. Add-ons need to be paid in full at the time of order. Hosting will be paid for a full year in advance.

Third-Party Software

On request we will implement third-party software or database connections to third-party software into your website (such as LawLogix Web Capture or Client Login). AWebsiteForLawyers is not responsible for the technical support of any third-party software. Please refer to the third-party’s technical support for any questions and concerns.
