

Website Design Terms

Once you sign-up, we will send you a document named "Design and Content", asking you to provide all details regarding content and design of your new website. We are able to customize the following parts of the samples provided on our website: Header information, header color, header theme (image background of header), navigation buttons, website background color, fonts, width and height of the site.

The purpose of our document is to define the work and services we will perform for you. We work closely together with you to create the design you like. Due to our low pricing we limit editing headers, buttons and basic design components to three samples.

Step-by-step design process

Due to our low pricing, we proceed in a step-by-step process creating your site:

1. Together with you, we start designing a framework (template) for your site. This design work is performed in Photoshop. You receive images of the design for approval.
2. Once you approve the design, we will start building the site in HTML and fill it with content.
3. From this point onwards, only minor changes in the design can be performed. Changing a design and its structure after content has been applied will result in additional hourly charges.
4. This does not apply to minor changes like font size, font color and font family.

Technical Limitations

Our designs are being produced within the limits of Adobe's Product line Version CS4. Designs and features that go beyond the technical possibilities of these professional products cannot be guaranteed. If you plan to implement Eastern languages, please check with us for availability. Some fonts from Thai, Korean, or Vietnamese might not be compatible.

Animations

We offer JavaScript slideshows as head banners for an additional price. We present you up to two different versions from which you can choose what is right for you. We ask you to proceed with us on a step by step basis. Changes that include redesign of key elements after previous approval will be calculated and charged at an hourly rate.

Payments

The full amount is required to start your project unless we agree to split payments into installments.

Add-ons need to be paid in full at the time of order. Hosting will be paid for a full year in advance. Orders can be only cancelled if we have not performed any services yet. We cannot give any refund for services already performed.

Incomplete Projects

In case a project is being delayed due to our client's failure to provide material such as information, text content, or images, we may require the full balance be paid after *six months*. However, we remain committed to complete the project within an additional six months.

Completion

We guarantee to present the completed site to you within seven days after receiving your material unless stated otherwise; editable sites and blogs are excluded from this rule. Completion within seven days cannot be guaranteed if materials are incomplete. Completely new designed sites are excluded from this timeline, although we usually are able to present the results within this time range. Completion is defined as either publishing the site on the Internet or the implementation of all details mentioned in the content and design document mentioned in the first paragraph (whatever occurs first).

As a courtesy to our clients, minor changes like text editing can happen for one week after completion.

Materials

We relate to materials that need to be provided by you as the choice of samples you would like to have customized, color preferences, content you would like to be displayed (texts, images in electronic form that can be easily edited in common formats, e.g. Word documents txt or rtf files, photos in jpg, gif, bmp, png or psd format), number of pages related to the topics of your choice.

Third-Party Software

On request we will implement third-party software or database connections to third-party software into your website (such as LawLogix Web Capture or Client Login). AWebsiteForLawyers is not responsible for the technical support of any third-party software. Please refer to the third-party's technical support for any questions and concerns.

Domain Name Registration

We will immediately secure your desired domain name (pending availability) and include the first year of service FOR FREE if you host with us. The domain is registered in your name with your information and you will be the only registrant contact on file. As an additional service we offer renewing your service as needed as long as you host with us.

Website Hosting

If you have chosen our hosting services, free web server maintenance and email setup on the server are part of our services.

Since we perform all maintenance on your specialized sever, we do not grant ftp access or even Cpanel to our clients.

You may request free weekly or monthly statistics to be sent to you via email. Further hosting terms are defined in a separate document.
